- Floors and decks
- Any Solid flat surface

Dimensions:

- 3.125" H x 1.74 Outside Dia.

Contents:

- 1 Post Mount w Plastic Cap
- (powder-coated aluminum)
-

1. SELECT LOCATION; DETERMINE BOLT LENGTH

Using the post mount as a template, pencil the hole location onto the mounting substrate. Drill hole with 3/8" drill bit. If hole already exists, align post mount with hole. Note you can install the mount through a larger hole than 3/8". Just be sure the washer you use is larger than the hole. Measure required bolt length and purchase a stainless steel 3/8" bolt of appropriate length, 2 washers and nut.

2. INSTALL MOUNT

With a ratchet and pliers place bolt with washer through the inside hole of the post mount and connect nut on opposite side (ad washer first). Securely tighten the nut. Place black plastic cap over the open end of the mount and push down until top of cap touches the top of the post mount.

3. INSTALL MANTIS

Now place the Mantis assembly onto the vertical post of the bracket, and lock in place. *Refer to the manual supplied with Mantis for detailed instructions.*
